Assignment

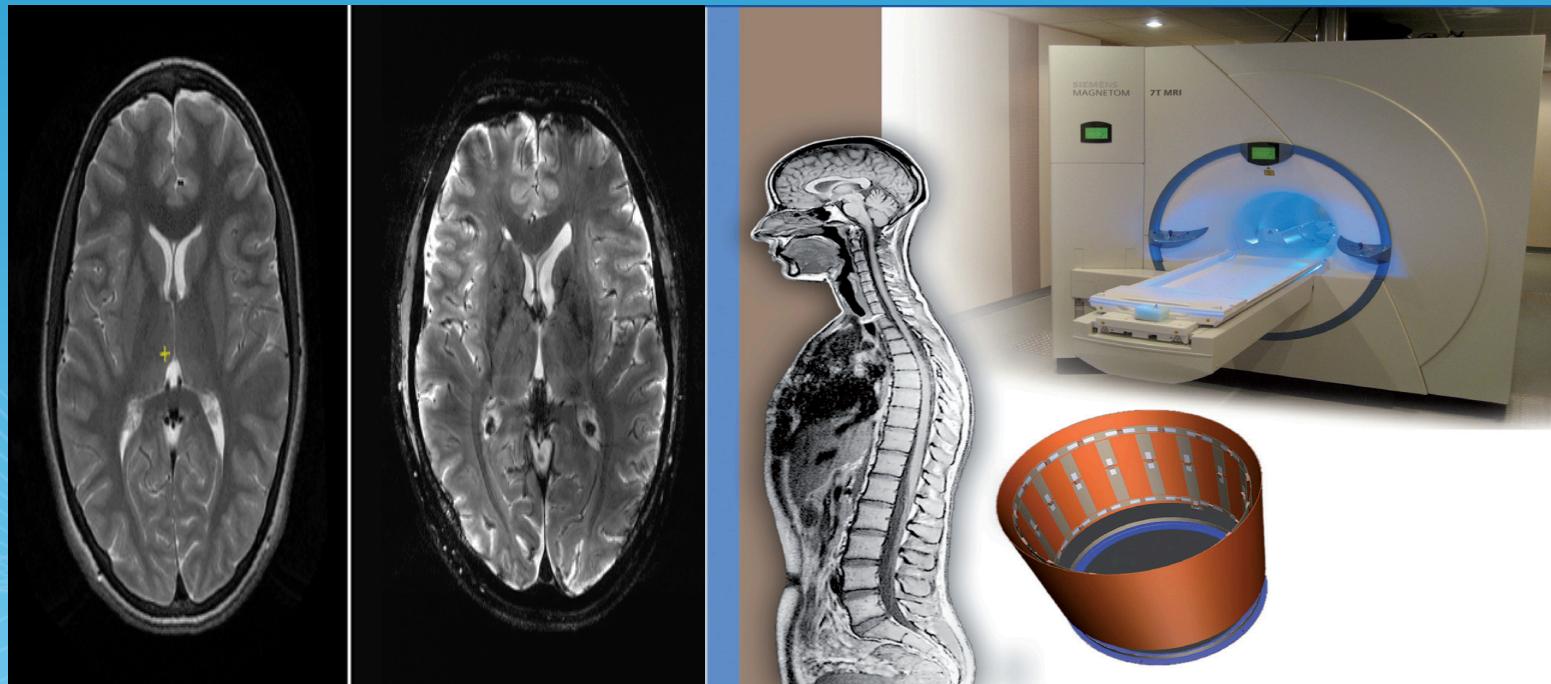

UNIVERSITÄT

ESSEN

to design a printed circuit for the I/Q-demodulator using the ICs and other surface-mount device (SMD) components and using microstrip line on a dielectric laminate as the printed circuit technology and using SubMiniature version A SMA coaxial connectors for signal input and output.

ESSEN

- An I Q Demodulator was designed for the 7 tesla
- The layout was designed by eagle
- The RF gain -11.3 dBm
- The baseband bandwidth 17 MHz
- The 1 dB compression point 12.3 dBm
